NATIONAL UNIFIED ELECTRONIC RECEIPT SYSTEM

DIGITAL TRANSACTIONS. A STRONGER PHILIPPINES.

SOFTWARE DOCUMENTATION / VERSION 1.0.0

Principal & Supplementary Documents

Document register and sample copies

National Unified Electronic Receipt System

12	13	1.0.0
SAMPLE COPIES	APPLICATION LABELS	SOFTWARE RELEASE

Principal invoices, supplementary payment and adjustment records, and clearly identified compatibility examples.

NUERS-DOC-SAMPLES-001

Revision 1.0 | 19 October 2026

Controlled sample pack. All transaction details are synthetic.
No sample in this pack is an issued invoice or a tax claim.

01 / PURPOSE & CONTROL

A clear record of each document

Prepared for product review, implementation handover and supporting documentation.

Control	Recorded value
Software	NUERS - National Unified Electronic Receipt System
Software version / pack revision	1.0.0 / 1.0
Document ID / prepared date	NUERS-DOC-SAMPLES-001 / 19 October 2026
Contents	7 principal invoice examples, 4 supplementary or adjustment examples and 1 purchase-reference example.
Evidence basis	Current NUERS document catalog, calculation service and shared document renderer; synthetic records only.

Classification basis

An invoice records the sale of goods or services. Supplementary records support collection, delivery or adjustments and do not replace the corresponding sales invoice. This pack separates document purpose from a template heading or application label.

[1] RR No. 7-2024

Reading guide	Pages
Principal document register	3
Supplementary and reference register	4
Field guide and application labels	5
Sample amounts and reconciliation	6
Twelve sample copies	7-18
Traceability and operating controls	19
Review checklist and scope limits	20
Sources and technical provenance	21

SAMPLE COPIES, NOT ISSUED DOCUMENTS

The specimens use the NUERS 1.0.0 renderer. They contain fictitious parties and document numbers, retain their DRAFT label, and do not claim BIR approval, registration or acknowledgement.

02 / PRINCIPAL DOCUMENTS

Principal document register

Invoices document a sale. The sample index distinguishes the seller's VAT registration from the tax treatment of each line.

ID / page	Document / application label	Purpose and sample scenario
P01 / 7	**VAT Invoice** vat_invoice	VAT-registered seller. VATable goods or services, with VAT base and amount shown separately.
P02 / 8	**Non-VAT Invoice** non_vat_invoice	Non-VAT-registered seller. Sales are reported as non-VAT; no output VAT is charged.
P03 / 9	**VAT-Exempt Sales Invoice** vat_exempt_invoice	VAT-registered seller; the example uses a wholly VAT-exempt sale. Actual eligibility needs a valid basis.
P04 / 10	**Zero-Rated Sales Invoice** zero_rated_invoice	VAT-registered seller; a qualifying zero-rated sale. The example shows the base at 0% VAT.
P05 / 11	**Mixed Sales Invoice - VAT seller** mixed_sales_invoice	VATable, VAT-exempt and zero-rated lines are separated within one invoice.
P06 / 12	**Mixed Sales Invoice - non-VAT seller** mixed_sales_invoice	Non-VAT and VAT-exempt lines remain distinct; VATable lines are not added to a non-VAT seller's invoice.
P07 / 13	**Service Invoice** service_invoice	Compatibility label retained by the application. Illustrates a VATable service; it is outside the main six-choice document wizard.

Invoice names and tax treatment

An invoice may be named for the transaction, including sales or service. Where one invoice combines different tax treatments, the relevant sales bases and VAT must be distinguished. The correct label does not by itself establish eligibility for exemption or zero rating.

[3] RMC No. 77-2024

ONE PURPOSE, MULTIPLE PRESENTATIONS

sales_invoice is a general application label. Its applicable invoice presentation is represented by P01-P06. It is not an additional sample or an extra sale.

03 / SUPPLEMENTARY DOCUMENTS

Supplementary and reference register

Payment, correction and delivery records remain traceable to the original transaction.

ID / page	Document / application label	Role and required relationship
S01 / 14	**Payment Receipt** payment_receipt	Evidence of a collection against invoice P01. The payment does not create the sale a second time.
S02 / 15	**Credit Note / Credit Memo** credit_memo	A reduction linked to P01, illustrated as a return or allowance. Keep the original reference and adjustment reason.
S03 / 16	**Debit Note / Debit Memo** debit_memo	An increase linked to P01, illustrated as an additional charge. Keep the original reference and adjustment reason.
S04 / 17	**Delivery Receipt** delivery_receipt	Compatibility example supporting the transfer of goods. P01 remains the associated sales invoice.
C01 / 18	**Purchase Invoice reference** purchase_invoice	Compatibility/reference example from the buyer’s perspective. It does not replace an authentic supplier-issued invoice.

Receipt classification

Official, collection, acknowledgement and payment receipts evidence payment or collection. They are supplementary records. NUERS maps the legacy official_receipt label to its payment-receipt presentation.

[2] RR No. 11-2024

COMPATIBILITY PRESENTATION NOTE

S04 and C01 use the current shared renderer, whose generic banner reads “Electronic Invoice.” Their exact document-type labels and reference purpose are recorded here. The banner alone must not be treated as their legal classification.

No standalone collection receipt, acknowledgement receipt, billing statement or statement-of-account template is asserted in this pack. Those names are not separate entries in the reviewed issuance catalog.

04 / FIELD GUIDE

What each copy contains

Use the document fields together with the register, not the title alone.

Field group	What to verify
Seller identity	Registered business name, TIN, branch and address. The samples use fictitious identifiers and display VAT registration.
Document identity	Document type, unique number, business date, source status and related document reference where applicable.
Customer / counterparty	Customer name, TIN and address as relevant to the transaction. A purchaser is distinguished from the supplier in C01.
Line items and totals	Description, quantity, unit, unit price, amount, discount, withholding and payable total. Monetary values are in Philippine pesos.
Tax breakdown	VATable base, VAT amount, VAT-exempt base, zero-rated base and non-VAT sales as applicable.
Payment / adjustment link	Original invoice reference, collection or adjustment amount, reason and payment details where recorded.
Evidence and presentation	DRAFT status, source notice, configured branding, and permit or verification evidence only when actually recorded.

APPLICATION LABEL MAPPING

Label or alias	Treatment in this pack
sales_invoice	General sales label; examples P01-P06 show its tax-based presentations.
official_receipt	Legacy alias represented by supplementary Payment Receipt S01.
credit_note / debit_note	Read-side names; credit_memo / debit_memo are the catalog labels used in S02/S03.
service_invoice / delivery_receipt / purchase_invoice	Retained compatibility or reference labels; examples P07/S04/C01.

The main creation wizard exposes VAT, non-VAT, VAT-exempt, zero-rated and mixed-sales invoices plus payment receipts. Catalog acceptance and a rendered sample alone do not establish that every compatibility workflow is enabled for live issuance.

05 / FINANCIAL INDEX

Sample amounts and reconciliation

All examples use PHP. Each is an independent demonstration, not a combined customer ledger.

ID / page	Total (₱)	VATable base	VAT	Other base / purpose
P01 / 7	2,240.00	2,000.00	240.00	VAT-inclusive sale
P02 / 8	1,000.00	0.00	0.00	Non-VAT 1,000.00
P03 / 9	1,200.00	0.00	0.00	Exempt 1,200.00
P04 / 10	1,500.00	0.00	0.00	Zero-rated 1,500.00
P05 / 11	2,420.00	1,000.00	120.00	Exempt 500.00 + zero-rated 800.00
P06 / 12	1,500.00	0.00	0.00	Non-VAT 1,000.00 + exempt 500.00
P07 / 13	1,120.00	1,000.00	120.00	VATable service
S01 / 14	2,240.00	-	-	Collection; no new sales base
S02 / 15	1,120.00	1,000.00	120.00	Credit / reduction
S03 / 16	560.00	500.00	60.00	Debit / increase
S04 / 17	2,240.00	2,000.00	240.00	Delivery values for reference
C01 / 18	1,120.00	1,000.00	120.00	Supplier purchase reference

VAT-inclusive arithmetic

P01: ₱2,240.00 ÷ 1.12 = ₱2,000.00 VATable sales; VAT = ₱240.00.
P05: ₱1,000.00 VATable + ₱120.00 VAT + ₱500.00 exempt + ₱800.00 zero-rated = ₱2,420.00.
P06: ₱1,000.00 non-VAT + ₱500.00 exempt = ₱1,500.00.

Separate linked scenarios

S01 collects ₱2,240.00 against P01. In a separate credit scenario, S02 reduces P01 by ₱1,120.00. In a separate debit scenario, S03 increases P01 by ₱560.00. These examples are not applied cumulatively.

For principal invoices and adjustments, the tax components reconcile to the displayed total. The receipt’s amount is a collection amount; it is not another tax base. S04 and C01 values illustrate reference layouts only.

VAT Invoice

Principal invoice • VAT-registered seller • VAT-inclusive transaction

Invoice issuance and BIR transmission are separate controls. Recorded permit references alone do not establish current approval.

NUERS 1.0.0 | Sample copy for document-template review only.

Sample tax classification only; verify actual registration and transaction eligibility before issuance.

06 / TRACEABILITY

Keep the document chain intact

The invoice establishes the sale; linked records explain what happened afterward.

01

Create the principal invoice

Use the correct seller identity, tax registration, item treatment and invoice series.

02

Record payment separately

Link the collection to its invoice; retain the payment date, amount and method.

03

Link any correction

Use the original invoice reference, adjustment direction, amount and recorded reason.

04

Retain the original and its history

Keep the invoice, related copies and recorded changes available for retrieval and reconciliation.

Collection is not a second sale

Supplementary receipts are proof of collection; the invoice remains the document for the underlying sale. Retain the invoice reference so a payment record is not included again as invoice sales.

[2] RR No. 11-2024

How the samples demonstrate the link

P01 is the original VAT invoice. S01, S02, S03 and S04 each show a related-document reference. The copies display their own numbers and amounts, preserving the distinction between the source sale and each supporting event.

BRANDING AND EVIDENCE

The specimens use the NUERS logo and standard A4 presentation. Actual merchant documents use their configured document branding. A logo, document number or preview is not evidence of BIR receipt or approval.

07 / REVIEW CHECKLIST

Review the form and the workflow

Use this checklist when comparing the pack with a configured NUERS deployment.

Review area	Acceptance check
Identity and classification	The seller registration, document purpose and selected type agree. Non-VAT and VAT-exempt amounts remain distinct.
Unique document identity	The correct series, document number, business date and source status are displayed. Sample prefixes are not reused for live documents.
Amounts and tax	Line amounts, discounts, tax bases, VAT and the final payable reconcile. Check rounding using stored monetary values.
Supporting relationships	Payment, delivery and adjustment records identify their original invoice. A correction retains an explanation.
Output consistency	Dashboard preview, PDF/download and customer-facing copy use the intended document branding and show the same transaction values.
Evidence and retention	Recorded references remain traceable; unrecorded permit, accreditation or verification data is not invented.
Environment separation	Test and sample records are distinguishable from live transactions in reporting and retrieval.

Variants within an invoice

Manual discounts and statutory sales categories, including senior citizen, PWD, national athlete/coach and solo parent transactions, are transaction attributes rather than separate principal document families. Their eligibility and calculations require separate transaction-level validation.

Scope of the supplied copies

This pack demonstrates the forms and their links. It does not execute live issuance, post revenue, debit a wallet, send a customer email or transmit a tax record. P07, S04 and C01 are catalog/renderer compatibility examples, not a claim of complete live workflow coverage.

The presence of a template is not a tax classification decision. Complete the organization’s document and issuance review using actual registration, transaction facts and current applicable requirements.

08 / SOURCES & PROVENANCE

Reference and reproduction record

Official guidance and implementation references used to prepare this pack.

[1] Revenue Regulations No. 7-2024

Invoice and supplementary-document framework; invoicing requirements. Relevant sections: 2 and 6.

Open official BIR publication

[2] Revenue Regulations No. 11-2024

Amends the transitory provisions; treatment of official, collection, acknowledgement and payment receipts. Relevant section: 8(2.1).

Open official BIR publication

[3] Revenue Memorandum Circular No. 77-2024

Clarifications on invoice naming, mixed tax treatments and supplementary documents. Relevant Q&A: 13, 25 and 27.

Open official BIR publication

Implementation reference	What it supports
Document catalog and invoice utilities	The 13 accepted document labels, six main wizard choices and type/alias presentation.
InvoiceCalculator / DocumentPdf	Amounts calculated in centavos; sample PDFs produced by the existing document export pipeline.
OfficialReceipt shared renderer	Current layout, logo, document fields, status notices and totals retained in each sample copy.
IssuedDocumentLedger / merchant reporting	Separation of invoice, receipt, adjustment and supplementary record families.
Software configuration	NUERS software release 1.0.0. Pack revision 1.0.

Sample-copy provenance

The companion archive contains the 12 original one-page PDF specimens, a CSV document register and a SHA-256 manifest. The consolidated pack places those same PDF pages within its branded page frame; their transaction contents are not re-created as screenshots.

Revision maintenance

Rebuild this pack when document labels, calculation rules, fields, branding or issuance workflows change. Recheck the official guidance for the intended use date. This is a software sample pack, not a certification or completed regulatory submission.
