# Merchants & sale categories

TXR-FVQIJRCKCGS8

One canonical row is shown per document identity. Payment events are linked evidence, not additional invoice sales. Recorded sums include all exported document types and statuses; they are not reconciled revenue or tax-return totals. Identity conflicts require review. Discount and VAT amounts are recorded values, not a new tax calculation. BIR evidence remains a separate status. This report does not establish BIR acceptance. Dates are labeled; received timestamps use PHT. “Not recorded” means unavailable, not zero. Exempt and SSPT fields retain source classifications; item-level non-VAT verification belongs in Sales Reports.
